PROFILE

Multi-disciplinary UX/UI designer who delivers polished, portfolio-ready work across enterprise dashboards, consumer mobile apps, and cultural web experiences. Rooted in rigorous user research and fluent in the full design process—from initial discovery to developer-ready handoff—with an eye for interaction detail that clients notice.

DESIGN CAPABILITIES

UX Process: Discovery, stakeholder interviews, personas, journey mapping, information architecture, usability testing

UI & Prototyping: Figma (components, auto layout, variables), Framer, Adobe Creative Suite

Interaction: Hover states, micro-interactions, responsive web, mobile-first design

Dev Handoff: React, JavaScript, HTML/CSS — can spec and build when needed

EXPERIENCE

UX/UI Specialist Intern | **DMS × Mastercard — Vancouver, BC** May 2025 – Aug 2025

- Delivered a full IA redesign of the workplace team SharePoint environment—structured content for 500+ users and validated a ~30% reduction in task-completion time post-launch.
- Produced client-facing personas and journey maps grounded in more than 12 stakeholder interviews, elevating the UX maturity of an established internal product team.
- Collaborated seamlessly across product, engineering, and operations—managing feedback cycles and shipping refined designs on 48-hour turnarounds.

SELECTED WORK

UX/UI Designer — Fraud Analytics Dashboard | **Mastercard × Simon Fraser University** Sep – Dec 2025

- Client-embedded project: sole UX designer interfacing directly with a Mastercard product manager to design a B2B fraud-detection dashboard from first principles.
- Research-led process: 8 user interviews with fraud analysts translated into 4 personas and a journey map that restructured the entire product information hierarchy.
- Delivered a visually refined, interaction-rich Figma prototype—tested in 2 validation rounds with fraud-domain experts, achieving zero critical usability failures.

UX/UI Designer & Developer — Chemtrails Travel App | **Simon Fraser University** Oct – Dec 2025

- End-to-end mobile product design: concept, research, wireframes, 20+ hi-fi screens, and interactive prototype for a trip discovery and journaling app.
- Interaction-led solution: hover-state and animation concepts informed by usability findings; navigated complex multi-feature IA into an intuitive 3-tab structure.

UX/UI Designer — Exhibition Locator Website | **Isola Design District, SFU** Oct – Dec 2023

- Designed a culturally-responsive interactive website with custom hover-based media interactions, earning a 90% satisfaction score from 10 test participants.
- Ran full usability cycle—testing, synthesis, iteration—resolving the top navigation pain point before public launch.

EDUCATION

B.A. Interactive Arts and Technology | **Simon Fraser University, Burnaby, BC** Expected Summer 2026
